GE.AI3A.066/060.SS+011

1500 rpm - Threephase - 50Hz - 400V Automatic panel without switching on board

Image for demonstration purposes

Standard equipment

Canopy Soundproofing

Removable soundproof canopy Painting canopy (RAL) in galvanized sheet steel Soundproofing with class 1 polyester material Handles with key lock and automatic closing Special baffles for air intake and air expulsion Inspection doors for controls and maintenance

Exhaust

Exhaust rain cap Insulated exhaust pipes Internal residential muffler - 35dB(A)

Fuel Supply

Single wall daily tank with bunded base Automatic shutdown system for low fuel level Fuel gauge

Handling

Lifting hook integrated into the bearing structure Base frame with anti-overturning forklift pockets forkliftable on the short side

Base Frame

Bunded base at 110% of fuel tank capacity Anti-vibrating mounting pads Battery compartment externally accessible for easy service

Engine

High coolant temperature and low oil pressure shutdown External oil drain points Engine liquids (oil and antifreeze) Tropicalized radiator

Alternator

AVR Automatic Voltage Regulator Impregnation for marine environment

Panel & connection

Rotating parts protection

Emergency Stop button Non-Automatic circuit breaker on panel board RCD with adjustable current and excludible Tamperproof panel IP55 Cable output from the bottom IP44 wiring Start-up battery (pre-charged) Grounding point

Control Systems on board QPE-C-SC-3F-4P-160-O2

operating scheme - schema di funzionamento

The QPE-C control panel represents the evolution of the panel for the control and management of the gen set. With its microprocessor logic it is able to meet any user requested features. The dual operation mode manual and automatic guarantees to every type of functionality protection, analysis and control of the generating set in order to make the management easy and efficient. Variant without transfer switch on board. ATS panel type QC as optional. The panel manages the QC panels directly or any other ATS panel.

PRP

Engines of this rating provide unlimited hours of usage in a variable load application. The average load factor should not exceed 70% of the engine's prime power rating with a maximum number of 500 operational hours at 100% prime power rating. An overload capability of 10% is available, however, is limited to a period of 1 in every 12 hours

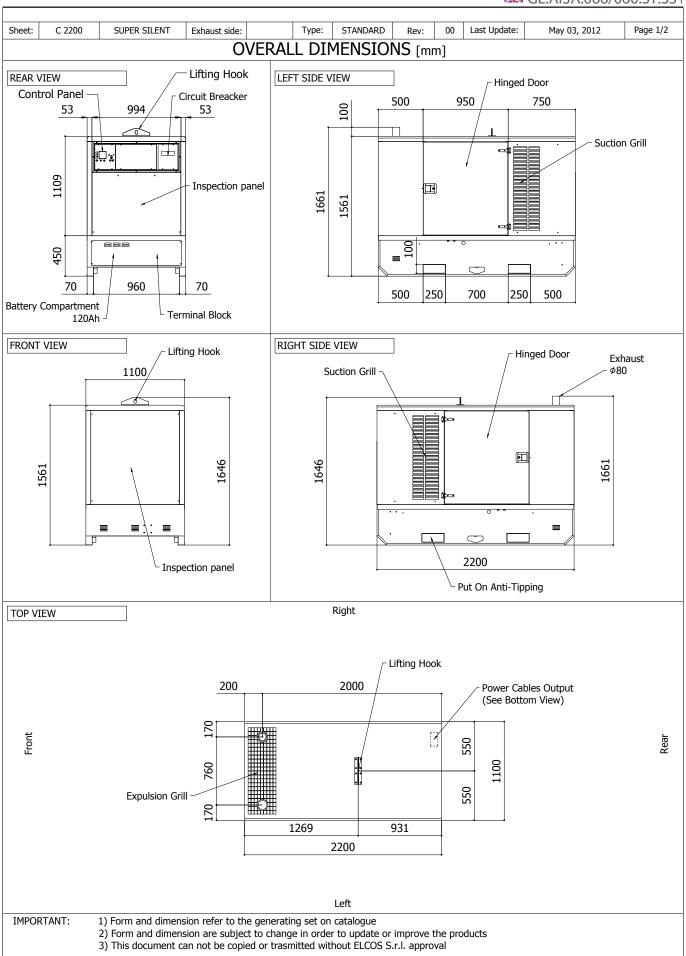

LTP

Limited-time running power is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500h of operation per year with the maintenance intervals. The overload is not allowed.

DIMENSIONS WITH OPEN DOORS [mm]

Left

Note: With Lifting-Off Door Solution consider only canopy dimensions.

(Models with "Control Panel" behind rear door will mount a special cover to protect it)

VENTILATION OF THE ROOM

The windows area in the generating set room needs to be (recommended):

Aspiration: 0.55 m2 Expulsion: 0.30 m2

ATTENTION: for a correct ventilation the expulsion air and the exaust gas needs to be conveyed in the open-air

IMPORTANT:

- 1) Form and dimension refer to the generating set on catalogue
- 2) Form and dimension are subject to change in order to update or improve the products
- 3) This document can not be copied or trasmitted without ELCOS S.r.l. approval
